### Mishaps Along Hard Luck Lane Befell Cameron Cleaner

Tom Mowdy, dry cleaning plant owner, gets the cake for a story of mishaps and hard luck last week.

Along the first part of the week a boiler in his plant showed signs of going out. He dismantled the steam container and spent more than two days trying to get it in shape. In the meantime clothes were accumulating for cleaning. Finally despairing of any hope to make the needed repairs he made preparation to go to Dallas late Thursday.

While crossing a street intersection after having stopped at the sign near the New Cameron Drug Co. his car was badly crushed when struck by an auto driven by Earl Burke, local postal employee. Undaunted he left that night for Dallas where he spent the day Friday buying a new boiler which cost him \$300. On the way back Friday night an oil truck turned his car over several times doing further damage to the machine. Neither Mr. Mowdy nor the negro driver were injured. Finally making it back to Cameron another day was spent in placing the boiler.

### PROTEST OF BANKHEAD BILL IS CITED HERE

A protest of the Bankhead Bill, the government's compulsory cotton acreage reduction law, is being voiced by many small farmers over the state and South. A suggested petition has recently been printed in

### TO THE SECRETARY OF AGRICULTURE, WASHINGTON, D. C.

We, the undersigned cotton farmers, solemnly protest against of the Bankhead cotton law stating — "Such allotments to any farm shall be made upon application therefor and may be made by the secretary based upon —

"2. By ascertaining the amount of cotton the farm would have produced during a fair representative period if all the cultivated land had been planted to cotton, and the reducing such amount by such percentage (which shall be applied uniformly within the county to all farms to which the allotment is made under this paragraph) as will be sufficient to bring the total of the farm allotments within the county's allotment."

If the government finds it necessary to extend the Bankhead law, in the next year, then we demand that the first plan be replaced by the second plan, as contained in Section 7, paragraph 2 the present plan of the cotton law, as we must consider it unfair and entirely detrimental to the small farmer, because the present plan does not make any difference between the small farmer who by diversification already reduced his cotton acreage and the large

### Ann Harding Comes To Cameron Theatre In "The Fountain"

The picture comes to the Cameron Theatre Sunday and Monday September 30 and October 1st.

"The Fountain" is an adaptation of the novel of the same name by Charles Morgan, famous English dramatic critic and author, a novel considered by many as the greatest piece of contemporary literature.

Encouraged by victory in the opening game here Friday against Marlin, Coach Wood's Yoemen will play West Friday night on the electric field.

Yoemen defeated Marlin 7 to 6. Marlin scored a touchdown in the first quarter but failed to kick goal. Cameron later in the game crossed the Bulldog's goal and kicked goal adding the winning point.

The following news story from West gives an interesting view of the game for Friday night:

WEST, Sept. 26th.—West High School's 1934 Trojans, with two weeks' of hard practice under their collective belts, will invade Cameron Friday night, September 28th, with hopes for a victory in their season opener. Though the men of Troy are rather green, and though they realize that Coach Wood's boys have had a week's practice since their Marlin opener, the locals hope to give the Yoemen the fright of their young lives in an attempt to win.

Coaches Dick Scott and Pat Jameson, new mentors in charge of the Trojans, found a squad of thirty-four aspirants out for practice the first week here. Included in the group are seven lettermen from last year's team and several husky first year men who are making the veterans hustle for their places. The squad is one of the largest in history of West, though several of the youngsters tip the beam at less than 130 pounds.

The fact that the locals have not won from a Wood-Coached eleven since 1924 gives an added incentive to the Trojans to do their best Friday night.

Scott and Jameson have not announced their starting lineup, but it is probable that seasoned men will be in several of the starting positions. Included will be: Poncik, Vanzura, Pleck, Smith, F. Dvoracek, C. Dvoracek, Urbis and Dieterman.

### TIME TO CHECK OVER HEATING EQUIPMENT

Wild geese have already started south, stepping up their usual schedules about a month, with the first flight in Texas reported in August by a Fort Worth citizen. Scientific minded gentlemen, observing this and similar occurrences in other parts of the State, have come forth with statements that early flights of geese foretell an early and hard winter. Joe Furneaux, manager of the local gas company, explains that while he can't pose as a scientist, in his opinion gas users would do well to check over their heating equipment now. "Too many people put off looking over their gas equipment until the first norther hits," he explained.

Now Is the Time "Now is the time to look over your heating equipment and have it set up. Wall cocks and old room heaters should be inspected and replaced if necessary. Whenever possible gas equipment should be connected with gas piping; if flexible tubing is used, it should be renewed as it is rarely good for more than one season. Additional heating equipment, if needed, should be purchased now, while gas appliance dealers have a complete selection, and installed before the last minute rush. ### Student Farmers In Visit to Silos On Batte Properties

Forty-one members of the third year class in vocational agriculture made a visit to the R. L. Batte farm Wednesday for the purpose of studying the improved methods of farming.

Two trench silos were visited, one being filled and the other containing finished silage and being fed from. The boys also visited the fields where the feed was being cut and finished the tour by seeing the cattle being fed silage, cottonseed meal and crushed corn. Mr. Batte sent a truck for the boys, hauled them to all parts of the field and returned them to school at noon.

"Silage is the best feed you can have," Mr. Batte told the boys. He is putting up 3,500 tons this year for his various farms. In addition he has 1,500 tons of dry fodder for his livestock. An alfalfa patch is also being grown near his home and some feed steers are being grazed on it now.

The trench silo now being filled is 18 feet deep and he plans to dig another 30 feet deep. The usual depth on most farms is 8 feet, and they may be as shallow as 6 feet. Mr. Batte has his silos dug on a hillside which allows free drainage after rains. The cost of trench silos is low as the trench does not have to be lined with concrete, although this is done in a few cases in Texas. A six inch layer of dirt is thrown over the silage to insure its fermentation.

There was a time

—when old-fashioned heating systems blistered your face while your back shivered.

But now...

with natural gas, winter is just another pleasant season in the modern home.

## A timely reminder

*Days are growing shorter, nights longer, and the first cold days of winter are on the way.*

NOW is the practical time to check up your heating equipment while winter is still "around the corner." Don't let obsolete or inadequate heating rob you of a pleasant indoor climate. Improved gas heating equipment and your dependable gas service will give you care-free, inexpensive comfort at the touch of a match and you'll find just the type heater to fit your particular need on display at your gas company or appliance dealer's.

If this were a gasless community, the next order of business would be laying in a supply of coal or wood. Of course,

your dependable gas service makes this fuss and bother unnecessary. All through the summer months your gas company has been "keeping your fuel service faithful"—improving facilities so that you may have the safety and security of a dependable natural gas supply again this winter.

... If for any reason your gas meter is not connected ready for winter—call your gas company NOW and avoid the rush of that first "norther."

An ample gas supply has been provided... pipe lines and distributing lines have been checked over... compressor stations have been overhauled. In fact, every detail of your gas service has been carefully perfected to assist you in stopping Jack Frost at the threshold of your home.

## 5000 Yards Terrace Run By Students of Farming In School

Thirty five members of the first year class in Vocational Agriculture ran terrace lines on three farms during the past week, the farms being those of Frank McClarren, John McClarren and Mr. Connor. More than 8,000 yards of terrace were run on the three farms. The boys worked in four squads, with a Bostrom-Brady farm level being assigned to each squad. Cecil Bell, J. L. Lampkin, Roy Mabry and Hubert Janicek were made captains due to their high rating made during their examination on terracing.

A number of other farms are yet to be terraced by the first year group. E. D. Parnell, vocational teacher says, and additional requests are coming in each week. The third year class in agriculture will do no terracing this year as most of their time is devoted to farm management problems.

automatic heating equipment for increased comfort and more healthful conditions in the home has been adapted by manufacturers especially for the moderate sized home. A small furnace which hangs beneath the floor, circulating warm air through a grill into one or two rooms; gas steam radiators, which manufacture their heat at the wall, and warm air circulators are some of the newer popular units. Their even, circulating heat which may be automatically controlled eliminates wall sweating and overheating with its attendant colds and other winter ailments.

thoughtful courtesies. Her home had been noted for social activities and was always interested in things pertaining to the improvement of her home town. She had reared an interesting family of children.

Surviving her are four daughters: Mrs. Sam Streetman of Houston, Mrs. John Pace of Haskell, Mrs. Dallis Young and Mrs. Will F. Paden of Cameron; fourteen grand children and a number of nephews.

Acrey, who after reading the burial scriptures, spoke of the beautiful life of the departed, and dwelled on her Christian and womanly characteristics. Interment was made in Oak Hill cemetery by the side of her late husband.

Pall bearers were grandsons of deceased: H. O. Clarke, Sam Streetman, Jr., McIver Streetman, of Houston, George Ownby of Dallas, Robert and Fred Young of Cameron and John Young of Archer City and Julian Baskin of Cameron.

trict Attorney. He was re-nominated in 1934 without opposition.

Deceased was a member of the Baptist church, president of the Men's Bible Class at Sunday school and a member and past president of the Adult Union of the Training Service for several years. Mr. Burns possessed a jovial disposition, pleasing personality and had made scores of close friends by his cordial manner.

The funeral was conducted at the First Baptist church Saturday afternoon at 2:30 o'clock by the pastor, Rev. N. D. Timmerman and Rev. B. B. Blaylock of Temple, former pastor of Cameron. Interment was made in Oak Hill cemetery.

He is survived by his widow, three sons, John, David and Tom Burns; his widowed mother, Mrs. Lizzie Burns; two brothers, John Burns of Houston and Bill Burns of Austin; two sisters, Mrs. Homer Collier of Port Sullivan and Miss Mary Burns who teaches school at Graham; several aunts, among them Mrs. T. S. Henderson and Mrs. George McGehee of Cameron and Mrs. M. M. Kemp of Waco.

## "THE FOUNTAIN"

the first great Harding triumph.

It gives Miss Harding every opportunity to display the full range of her fine dramatic interpretation. She is called upon to run the gamut of human emotion.

Opposite the Harding role are two male parts that also call for the deffest of dramatic interpretation. No finer players could have been secured for these roles than Paul Lukas and Brian Aherne. Jean Hersholt, Violet Kemble-Cooper, Ralph Forbes and others are in the pretensions east.

John Cromwell, who directed Miss Harding in "Double Harness," and who recently completed the sensation "Of Human Bondage," with Leslie Howard, rejoins Miss Harding in this picture.

"The Fountain" is a romantic triangle drama painted against the background of Dutch neutrality during the world war.

be taken away from her.

Pancho starts to dance, Chatita stages a counter attraction and accomplishes her purpose far better even than she had intended, for it brings success to both her lover and herself.

"La Cucaracha" was a barracks song of the days of the Villa revolution, its lyrics having been revised for this picture. Colorful Mexican dances are woven into the story, and rhythmic music of Rhumba orchestra adds to the charm of the color film.

Steffi Duna, tempestuous Hungarian actress, has the role of Chatita and Don Alvarado is Pancho. Paul Porcasi has the important role of the music hall impresario. Lloyd Corrigan directed this exodid picture, the breathlessly beautiful color composition of which is by Robert Edmond Jones. It is a pioneer picture production for RKO-Radio.

### Black-Draught Brings Refreshing Relief of Constipation Troubles

Constipation produces many disagreeable sensations, several of which are mentioned by Mr. T. E. Stith, of Boonville, Ind., who writes: "I have used Thedford's Black-Draught many years when needed for biliousness and other minor ills when a laxative was needed. It was the first game of the season for both teams and incidentally, the first football game in Sharp history.

## CORN-HOG CONTRACT SIGNERS WILL VOTE

Corn-hog contract signers in Milam county will be asked to vote on the 1935 plan of the corn-hog section of the AAA according to word received here by county farm demonstration agent Geo. Banzhaf from E. M. Regenbrecht, extension swine husbandman. The referendum is set for the first week of October.

**Meet in Kansas City**  
Regenbrecht represented the Texas Extension Service in the AAA meeting held recently in Kansas City where farmers and representatives from state agricultural colleges from Kansas, Missouri, Iowa, Nebraska, Oklahoma, Arkansas and Texas met to make recommendations for the next steps in the corn-hog program. The first question discussed at Kansas City and to be voted on by corn-hog contract signers is whether or not there shall be any sort of adjustment program in this field, Regenbrecht stated.

The second point to be decided is whether the contract shall deal with corn only or hogs only or be a joint contract as in 1934.

**Six Basic Grains**  
The third question will ask for preference on the type of contract which they wish to follow the 1935 program. This refers to the possible unified contract for the six basic grains: wheat, corn, rye, barley, grain sorghums and flax. It would represent a shift from several single crop contracts to a broad program of developing better systems of farming through less intensive use of land, conservation of soil resources and use of land for those crops for which it is best adapted.

The fourth question will be voted on only by those contract signers who are grain sorghum growers for grain. It will ask if they prefer that grain sorghums be included in the 1935 contract. The exact wording of the question will be available at the time of the referendum.

**Both Hogs and Corn**  
At Kansas City the voting was that benefit payments be made on both corn and hogs, that the established 1932-33 base in the 1934 program for both corn and hogs be us-

ed, with benefit payment of \$3 per head on 75 per cent of the 1932-33 hogs, and of 40c per bushel on the appraised yield of contracted corn acres; and that the growing of hogs be permitted up to 8 per cent or 85 per cent of the base, and corn acreage increased up to 75 per cent to 90 per cent of the base, the exact percentage to be optional.

Other recommendations made by the conference were that contracted corn acreage be used without restriction for hay, pasture, soil improvement, soil erosion prevention crops, fallowing, or for forest plantings; that grain sorghums be included in the 1935 contract on the same basis as corn as to adjustments, benefits and tax; and that the base of processing tax be broadened to include other commodities in proportion to the benefits accruing to them from this program.

**Warehouse On Farms**  
It was also recommended that the plan for warehousing corn on the farm be continued and the same principle extended to other grains, and that the 1935 corn-hog contract be made a step toward a long-time contract program to begin in 1936. It was asked that the referendum be held the first week in October; that the questions be clarified and made more specific; and that the poll be taken by unpaid workers. "It must be remembered that these were merely recommendations to the AAA and that they may or may not be followed," Regenbrecht said.

Jake Dodson of Burlington, old time resident of that section, will read The Herald for 1935, being among the number of recent new readers.

**Y**OUR electric light and power service is *always dependable* because in the beginning the Texas Power & Light Company recognized that transmission lines only could provide dependable service every minute of the day, year in and year out. Small and inefficient local plants were displaced by these transmission lines, which connect large and efficient generating stations.

Your company has grown and expanded to meet the ever-increasing requirements of the community for dependable, adequate and economical service. Most every home in town uses many times the electricity today that it used a few years ago . . . and pays little, if any, more for this enlarged service.

What a difference electric service plays in the comfort and efficiency of the home! Today's inexpensive electric light bulbs are a far cry from the old-fashioned bulbs which gave little light and consumed much electricity. Dependable electric service has made possible the development and perfection of the many electric appliances now regarded as necessities in homes everywhere.

*Dependable . . . Yes. Adequate . . . Yes. Economical . . . Yes.* Your electric service is all of these because your company has kept abreast of the times . . . it has spared nothing to make your service the best.

*Transmission Lines are Sentinels of Dependable Service*

The marriage of Nancy Rea Slocumb, daughter of Mr. and Mrs. B. Slocumb of Cameron, to James William Hagood of Austin, was solemnized Friday evening September 21 at 8 o'clock in the First Methodist church, Rev. B. T. Mrs. Clinton played the organ for the entire ceremony, with much color and beautiful expression. nell Neinst, Miss Frances Sharpe, Mrs. Conn Miller, Mrs. A. S. Epper-son, and Mrs. A. F. Mitchell of Corsicana.
